SAFETY ALERT: 23

Dhanbad, dated 04.08.2026

SUBJECT: Fatal accident occurred due to falling of 60ton dumper from Rehandling OB dump at Kusmunda Opencast Mine.

1. Name of Mine : Kusmunda Opencast Mine
2. Name of Owner : M/s SECL
District : Korba
State : Chattisgarh
3. Mineral : Coal
4. Date and time of accident : 21.06.2026 and C shift (12:45AM)
5. Place of accident : Rehandling OB dump
6. Killed : Name: Satyanarayan
Designation: Dumper Operator
Age: 43years
Experience: 05 years in work Operation.
7. Seriously Injured : NA
8. Brief Cause : Cause of the accident as informed by the Mine management, in C shift at about 12:45 AM, the 60T Dumper, while carrying out dumping operation, the dumper crossed the berm at the dumping edge and fell down, resulting in the vehicle overturning due to which operator sustained serious injuries to which he succumbed on the spot.
9. Sketch showing the accident:

10. Best Practices:

1. Maintain Safe Distance from Dump Edge:- Dumpers and other heavy earth-moving machinery should always operate at a safe distance from the dump edge as specified in the mine's Standard.
2. Operating Procedure (SOP). A clearly demarcated safe operating limit should be established and strictly enforced.
3. Construction and Maintenance of Safety Berms:- Adequate stop-blocks, berms, or safety bunds of sufficient height and strength should be provided along dump edges. Safety berms should be regularly inspected and maintained to ensure their effectiveness.
4. Operator Training and Competency on Defensive Driving:- Only trained, competent, and authorized operators should be permitted to operate dumper. Special training should be provided on dump-edge operations, machine controls, blind spots, and emergency response procedures.
5. Seat Belt Usage:- Operators must wear seat belts at all times while operating mobile equipment. Supervisors should ensure strict compliance with seat belt requirements. Seat belts significantly reduce the risk of ejection during rollovers or sudden movements.

***Safety Alert**, a tool utilized by DGMS, informs the mining industry about potential safety issues and offers recommendations to prevent such incident.
